Summary

Frontend-focused Full Stack Developer skilled in React, TypeScript, and Next.js, with experience building full-stack applications using Node.js, Express, Prisma, MongoDB, and PostgreSQL. Strong foundation in modern web development, API integration, responsive UI design, and scalable application architecture. Passionate about building intuitive user experiences and solving real-world problems through clean, maintainable code.

Education

B.Sc. Karim City College, Information Technology Jamshedpur, India
• Data Structures, Web Development, Databases Jan 2023 – Jan 2027

Experience

Branduck, Web Development Intern Jamshedpur (Remote)
• Built and customized enterprise web applications using Oracle APEX with JavaScript and CSS. Oct 2023 – Jan 2024
• Developed reusable UI components improving responsiveness and visual consistency. 4 months
• Worked with SQL tables and queries to support application data requirements.

Projects

Trackle

A full-stack student management system built for tutors and educational institutions to track homework, test performance, and overall progress with interactive dashboards and analytics.

- Implemented role-based access for teachers and students.
- Built REST APIs using Express and MongoDB with JWT authentication.
- Developed frontend using React, TypeScript, and Tailwind CSS.

Dynamic Web Scraper

Built a configurable Node.js web scraping tool using Cheerio that extracts structured data from static websites with pagination support and exports results as JSON.

- Supports multi-page scraping through automated pagination handling
- Uses configuration-based selectors to scrape different websites without modifying source code
- Generates structured JSON output for downstream processing and storage

Tree Type

Built a typing speed test application using React, TypeScript, and custom keyboard event handling. Implemented a real-time typing engine with accuracy tracking, WPM calculation, timer-based tests, and dynamic caret positioning.

- Developed a custom typing engine supporting character validation, word navigation, and back-space correction
- Implemented real-time performance metrics including Words Per Minute (WPM) and typing accuracy
- Built a dynamic caret system that tracks the active character position across wrapped text layouts
- Managed complex typing state and keyboard interactions using React Hooks and TypeScript

Skills

Languages: JavaScript, TypeScript, C++

Frontend: React, Next.js, HTML, CSS, Tailwind

Backend: Node.js, Express, MongoDB

Tools: Git, GitHub, Postman
